

THURSDAY 11 NOVEMBER - WORKSHOP 1C

09:00 – 12:00 Do it with twins: tips for twin studies and registers

Title presentation: Longitudinal studies and the impact of Covid

Speakers: Emanuela Medda, Italy & Jane Loke, Australia

Emanuela Medda

Center for Behavioral Sciences and Mental Health, Istituto Superiore di Sanità, Rome, Italy

emanuela.medda@iss.it

Senior researcher in the Center for Behavioral Sciences and Mental Health of the Istituto Superiore di Sanità (Italian National Institute of Health). She is an epidemiologist with a long experience in study design and statistical analysis of biomedical data. Since the inception of the Italian Twin Register in 2001, she has been involved in conducting twin studies on different phenotypes. Current research interests focus on chronic diseases, well-being and other psychological traits.
